FULL FEATURES

- Powered head and foot positioning
- Half rails included
- Pendant controller
- Under-bed black-box electric motors

PRODUCT DETAILS

Separate positioning from height

The pendant controller operates the listed head and foot positioning functions. Ask ProLine to confirm the height-adjustment method and required setup for this semi-electric model.

Plan mattress and total load

The sleep deck is listed at 35 by 80 inches, with a standard deck-height range of 11 to 22 inches. The evenly distributed 450lb total capacity includes the occupant, mattress, rails and accessories; it is not an occupant-only rating.
