FULL FEATURES

- Powered head, foot and height positioning
- Full rails included
- 8-19 in low deck height
- Under-bed black-box electric motors

PRODUCT DETAILS

Powered adjustment in a low-bed format

Black-box electric motors operate the specified bed adjustments, while the slat-style deck forms the mattress-support surface. This HC5500FEFR configuration pairs the low deck-height range with included full rails.

Account for mattress and accessories

The deck-height range excludes the mattress and accessories. The evenly distributed 450lb total capacity includes the occupant, mattress, rails and accessories. Use the 35 by 80-inch sleep deck and overall dimensions when confirming the complete configuration with ProLine.
