HC8500FEHR

Full Electric Homecare Bed with Spring Deck

Homecare bed with three linear motors

The HC8500FEHR combines full-electric operation, three linear motors and a split-spring deck in a homecare bed. The named motor arrangement and deck construction distinguish this model when comparing bed configurations.

FULL FEATURES

- Three linear motors
- Split-spring deck
- 450 lb capacity

PRODUCT DETAILS

Powered bed configuration

Full-electric operation and three linear motors are specified for this model. The split-spring deck provides the listed mattress-support construction. The sleep surface measures 36 by 80 inches; mattress or rail inclusion should be confirmed as part of the order.

Optional extension and load details

The HCP8EXT is listed as an available extension accessory for this bed family. Confirm its components and required mattress arrangement separately. The catalog lists a 450lb capacity; confirm the complete-load basis and selected accessories before choosing the final setup.
