FULL FEATURES

- Dual linear motors
- Split-spring deck
- 450 lb capacity

PRODUCT DETAILS

Semi-electric configuration

Dual linear motors and semi-electric operation are listed for this model. Confirm the positioning controls and height-adjustment method with ProLine when specifying the bed.

Coordinate the sleep surface and extension

The sleep surface is listed at 36 by 80 inches. HCP8EXT is the named extension accessory for the HC8000/HC8500 families. Confirm the mattress, rails, extension components and complete-load basis for the listed 450lb capacity as one coordinated configuration.
