RCON5L

5 Liter Oxygen Concentrator

Oxygen concentrator

The RCON5L is the ProLine 5-liter oxygen concentrator model, supplied with accessories that include a humidifier bottle and two nasal cannulas. Its cabinet filters and accessible internal filters are useful details for equipment and service planning.

FULL FEATURES

- Humidifier bottle supplied
- Two cabinet air filters supplied
- Accessible internal filters

PRODUCT DETAILS

Review the supplied equipment

The listed package includes a humidifier bottle, two nasal cannulas, a Christmas-tree fitting and two cabinet air filters. Confirm replacement accessory and filter requirements using the RCON5L model reference.

Confirm operation and service requirements

Published weight and noise figures conflict, so both need confirmation from ProLine. Request current operating specifications and filter-care instructions for RCON5L; the 5-liter catalog designation does not specify an oxygen setting or flow range.
